HEADQUARTERS

Sealing solutions & expert advice to keep industry moving!

M Barnwell Services Ltd – the UK's leading distributor of Fluid Sealing Products

Reputation - ask anyone in the industry and they will acknowledge that we are the largest specialist Oil Seal stockist in the country. But more than that, we are continually introducing new and innovative ideas to help our customers to rationalize and improve their lines of supply.

Tradition - the business was formed over 30 years ago by the current chairman and managing director, Mike Barnwell and several members of the family are employed in a variety of functions within the organisation. The company has a large number of staff with a wealth of experience in solving sealing problems for industry – locally and nationally. From an original supplier of oil seals, Barnwell has grown to become the recognized specialist in our field and continues to introduce new items to complement our traditional core products.

Technical Capability - sealing problems are frequently not straightforward and require technical know-how when choosing the correct product for the right application.

We provide accurate and informed sealing guidance across the entire spectrum of industrial and automotive sealing applications.

Warehousing and stock control

Quality – Barnwell only supplies products of the very highest quality and our partnerships with some of the world's leading manufacturers means that our customers can have total peace of mind when placing their requirements in the hands of the UK's most trusted distributor.

All incoming goods must satisfy our rigorous quality control procedures and are systematically inspected to established sampling plans. Our Goods Inward Department is fully equipped with the latest measuring and testing equipment. As a BSI registered company, it's not surprising to find that our already high quality standards are continually monitored and improved still further where possible.

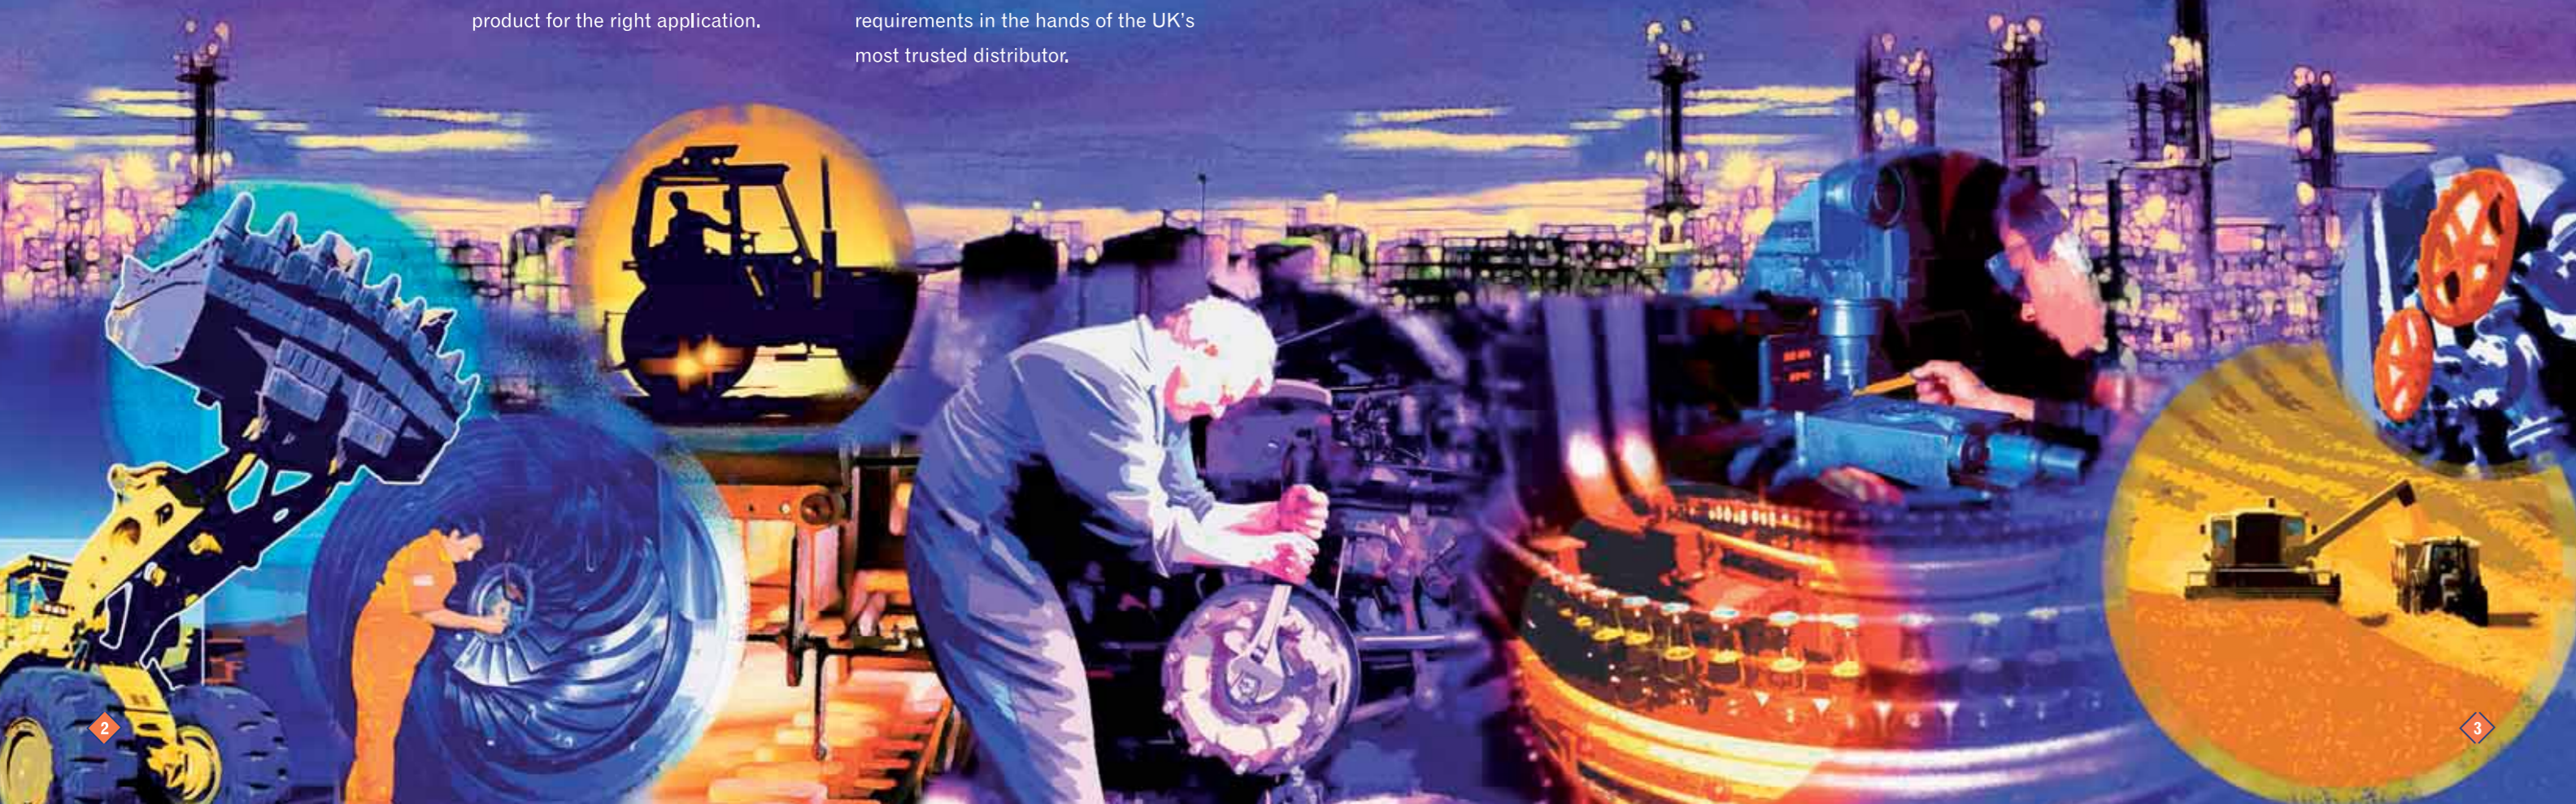

Availability – Our national network of Customer Service Centres respond to a nationwide demand from industry for quality sealing products. The centres are supported by a central warehouse in The Midlands that holds over £2m worth of stock, covering over 25,000 different product lines. Our strategically - placed outlets carry specially profiled stock, thus ensuring that we have the right products in the right place – on demand!

Specialist Services – We at Barnwell are always in touch with the needs of our customers and as needs change, which they inevitably do, we respond by introducing new products or services when required.

Customer support

Our People – We see the distributor's role as much more than simply stocking and supply. Customers often need advice on a particular product application, whether that is simply to establish the best product for the job, or where in-depth technical support is necessary.

Our company prides itself on the long service and knowledge of our staff – over 35% of our people have more than 10 years service! Product knowledge, technical expertise and enthusiasm is on hand – wherever you are and whenever you want it!

Our growing family of specialist services

Create a better impression... without being involved.

Let Barnwell take the time consuming and expensive process of building kits out of your production process by using our superb sourcing, assembling, packaging and branding service –

premises and allowing you to do what you do best!

Packed

Our **First Impressions** warehouse contains an extensive range of automated bagging machines.

We can assemble and pack kits or individual items in a variety of containers, including polybags, shrink wrap cards, blister packs and boxes.

First Impressions

A dedicated facility at our central warehouse is available to undertake this work for you - from product sourcing, right through to delivery of own - branded packages.

Branded

Packages are produced with your product description, part number and bar code, but more than this, we can produce kits printed in your own brand image, helping you to make sure that the **'first impression'** that you give to your customer has a lasting impact!

Clean room facility

A special clean room facility at our headquarters is available to our customers. Components are assembled into kits under stringently controlled temperature and atmospheric conditions. Please ask for further information.

Seal Maker Service

Our CNC machine can manufacture urgent or special seals in a wide range of profiles and materials, including Nitrile, FPM, Silicone, EPDM, PTFE and Polyacetal.

Seals up to 420mm O.D. can be made on site and larger sizes can also be produced quickly if required.

- No minimum quantity
- No minimum start up charge
- No tooling limitations
- Bespoke profiles service
- Rapid delivery

BARNWELL
THE SEAL OF APPROVAL

For more information on any of our specialist services, call our Smethwick headquarters on **0121 429 8011** or visit our website at www.barnwell.co.uk

Sourced

We are experts at sourcing and purchasing industrial consumables. We currently hold a stock of over £3m worth of quality sealing products, covering over 35,000 different product lines. Barnwell can stock products for you, freeing up space at your own

Labelled

A range of high speed label printing machines with the latest bar code software, print information on to both standard and holographic labels. We also print directly on to polythene bags.

Delivered

Experienced staff at our **First Impressions** facility will ensure that your 'ready to go' branded products are made available for delivery to suit your own production schedule – where you want them and when you want them!
