

## Image Branding Service

We at Barnwell are expert in producing bespoke kits to suit a customer's specific requirements. Whether standard products or a mix of these and the customer's own parts – we will design and assemble a kit that does the job.

But it doesn't end there – if you prefer, we can brand the boxes with your own logo and part number through our unique IMAGE BRANDING SERVICE.

To service our customers needs, we created a dedicated facility in Smethwick, to assemble sealing kits that carry the customers' own brand image.

Vast stocks of sealing products are available at our adjacent central warehouse. They are made

up into kits and sleeved, bagged or boxed in the customers' full brand image, with part numbers and descriptions added.

Our Image Branding Service eliminates a time consuming and costly element in their production process, allowing them to concentrate on what they do best. Barnwell now has a prestigious list of blue chip companies that are benefiting from the service.

## Clean Room Facility

Our investment in a 'Clean Room' at our headquarters in Smethwick is a direct result of demand from key customers. Where applications dictate totally uncontaminated products being fitted, customer components are assembled into kits under stringently controlled temperature and atmospheric conditions.

The facility has been commissioned 'Class 10,000'. This means 'less than 10,000 particles per cubic foot of air of 0.5 micron and greater'. (This room is 1 million times cleaner than the average kitchen!).
